

Are you safe on the roads? It's the wiper view that's important!

BOSCH
Invented for life

The wipe patterns show extracts from the inspection requirements for wiper quality. So it's clear when windshield wipers should be changed. The ideal choice when changing wipers: Bosch Twin and Bosch Aerotwin, the test winners.

		<p>Outer field of view</p> <p>Central field of view</p> <p>Outer field of view</p>	
<p>No streaking. No action necessary.</p>	<p>A maximum of 3 permanent streaks in the outer field of view. No action necessary.</p>		
<p>A maximum of 1 permanent streak in the central field of view. We recommend you change your wipers.</p>	<p>A maximum of 4 permanent streaks in the outer field of view or 12 temporary streaks across the entire field of view. We recommend you change your wipers.</p>	<p>A maximum of 6 permanent streaks in the outer field of view, many permanent or temporary streaks, evenly spaced. We recommend you change your wipers.</p>	
<p>Patches of water remaining on any part of the area wiped. New wipers urgently required.</p>	<p>Haze formation under the clamping points. New wipers urgently required.</p>	<p>Haze formation. New wipers urgently required.</p>	<p>Chatter marks. New wipers urgently required.</p>
